

WEIRD PLANTS!!!

BY ROBERT

The ugliest plant in the world (according to google) is *Amaorphophallus titanum*, DID YOU KNOW: This plant's flower is actually a corpse flower.

The biggest leaf plant is called *Raphia regalis*, DID YOU KNOW: it is an Indian bean tree.

The luckiest plant is called the money tree (it does not grow money) DID YOU KNOW: they can grow up to 60ft tall.

The smallest leaf plant is called water meal (it is not edible) DID YOU KNOW: it is the size of a grain of rice.

The most dangerous plant is called *Aconitum* (it is poisonous) DID YOU KNOW: it can cause vomiting, bloody diarrhea, increase heart rate, low body pressure and death in a few days if victim is not treated.

The strange life cycle is: (seems like a normal cycle:|)

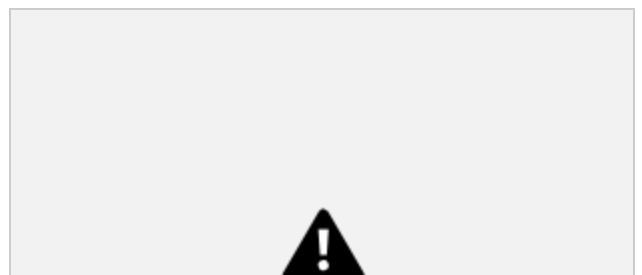

- Seed stage
- Germination
- Growth

- Reproduction
- Pollination
- Spreading seeds

The smelliest plant is called Titan Arum (eww stinky)
DID YOU KNOW: it is one of the rarest and largest flowering structure.

The tallest plant is called Sequoia Semperirens it is very tall (hello up there) DID YOU KNOW: it is 380.1ft tall (115.85m)
