

## Weird plants by George Parkinson

20/04/20

There are many weird and strange looking plants all over the world.

**Welwitschia mirabilis:** World's Most Resistant Plant. This plant lives

This plant looks scary and messy

from 400-1500 years. This plant has only two leaves and a thick stem with roots. The leaves continue to grow like sci-fi alien, it can grow to almost 2 meters high and 8 meters long! It can survive up to 5 years without rain. This plant lives in the desert.

The Venus fly trap plant

*The Venus Fly Trap is a clever plant it is most famous because of its unique traps, but it's also threatened. The plant's two hinged leaves are covered in ultra sensitive fine hairs that detect the presence of everything from ants to arachnids. Trigger the hairs and snap! The trap will shut in less than a second.*

I love this plant it is cool
