Animals in the circus.

I think some animals should stay in the circus, but some should go because for an example, it would be boring for the crowd if they all went. I think clowns and mimes are boring. If some animals stayed it would be less boring because then there would be monkeys swinging around everywhere and dogs jumping through fire hoops! Isn't that more fun than clowns?

The reason why I think some animals should go is because you can see they don't like it and its cruel. Its not their habitat and people could get injured or killed from, Lions, Tigers, Elephants and Bulls. Plus if the animals did do something wrong they would probably kill them and I wouldn't want that.

All wild animals are banned from circuses in England, since 2015. But sadly, this is not the case in other countries.
