

## *Career Assignment: Garment Technologist*

### *Task: Where do clothes come from?*

*In each item of your clothing, you will find a label which tells you how to look after your clothes and what they are made of.*

*Choose 5 items of clothing (try and choose ones which are as different from each other as possible!).*

*Look at the inside label - there's an example above! - and discover what fabric it is made from. Does it tell you the country too?*

*Mark on the map where your clothes have travelled from!*
