

Career Assignment: Research Meteorologist

Task: Storm Chasing

Research the main weathers mentioned:

Big Hail

Tornado

Extreme Flood

Storm Chasers follow storms around the country trying to discover more about them.

Can you write a job advert for this role? Include persuasive language, technical vocabulary and make it sound appealing!

To start you off, I've included a basic job description below!

"**Storm chasers** work solo or in a team. They research developing **storms**, navigate to a **storm's** location, make observations, gather data, document the **storm**, and capitalize on the experience. To be successful, they need cameras, Internet access, satellite phones, vehicles, GPS, and other equipment."
